CLINTON OSUNBOR

BUSINESS SYSTEMS ANALYST

Lagos, Nigeria • +2347045671233 • clintonosunbor361@gmail.com • clintonosunbor.com • linkedin.com/in/clintonosunbor

PROFESSIONAL SUMMARY

Business Systems Analyst with a track record of identifying business problems, defining digital solutions, and delivering measurable outcomes. Led the design and deployment of a production intelligence system that has processed over **5,000 items** and calculated over **₦50 million** in payments. Also achieved **₦8.2 million** in first-year subscription cost savings.

WORK EXPERIENCE

Business Systems Analyst | Deji & Kola — Dec 2024 – Present

Product & Systems Development

- Led the design and deployment of a production intelligence system, translating operational requirements into a digital platform that has tracked over **5,000 items and calculated over ₦50 million in payments**.
- Reduced operational errors by **70%** and saved over **3 hours weekly** through streamlined production and payroll workflows, role-based access controls, automated validation, and a reconciliation feature that enables staff to verify completed work before payment.
- Built a CRM-integrated alert system via API and Apps Script that proactively flagged approaching order deadlines, **directly improving fulfilment rates** and reducing late fulfilment risk.

Cost Reduction & ERP Optimisation

- Recovered ₦1M in upfront costs and eliminated ₦600K/month in recurring ERP spend by auditing license usage around actual role requirements saving an estimated **₦8.2M annually**.

Compliance & Reporting

- Cut SMS delivery failure rate by 40% by building a multi-country messaging system. Implemented US A2P 10DLC compliance, provisioned a UK number, and wrote a routing script that directs messages based on customer country code. Standardised number formatting at the CRM level to eliminate failures at the source. **Ensuring regulatory adherence and improving customer communication reliability.**
- Replaced static Google Sheets reporting with a centralised Looker Studio dashboard system. Pulling and cleaning data across multiple departments to surface sales trends, production timelines, staff attendance, and customer service performance in one place for the first time, **giving management better visibility** into the business.

Operations Assistant | Wildfire Business Solutions — Jul 2024 – Dec 2024

- Served as the primary bridge between international stakeholders and the development team, translating ambiguous business requirements into precise technical specifications, **reducing back-and-forth** and keeping projects on track across time zones.
- Introduced SMART goal methodology via ClickUp to track deliverables and team output, improving task visibility and accountability across active projects.

SELECTED PROJECT

Event Registration & Ticketing System

- Translated manual registration and payment reconciliation challenges into a digital event registration solution, incorporating payment workflows, registration records and automated confirmations.

EDUCATION

B.Sc. Industrial Physics — University of Benin 2019 – 2023

- Relevant coursework in analytical thinking and problem solving.
